

Double-sided thermal dissipating tape 25m

Product code:

Reference: 3564

Technical specifications:

REFERENCE: 3564

Construction Material: Flame retardant thermoplastic

Certifications: CE - ROHS

IP : IP20

Dimensions (mm): $\Phi 122 \times H7 \text{mm} \times 25\text{M}$.

Product short description:

Do you want to take your LED lighting experience to the next level? Then you have found the perfect companion for your LED strips! Introducing the 25-meter double-sided thermal conductive tape, an innovative solution that combines exceptional thermal resistance with reliable adhesion. Optimize your LED lighting experience and enjoy outstanding durability.

Product description:

Double-sided thermal dissipation tape, 25m, for LED strip

Want to take your LED lighting experience to the next level? Then you've found the perfect companion for your LED strips! Introducing the 25-meter double-sided thermal dissipation tape, an innovative solution that combines exceptional thermal resistance with reliable adhesion.

This thermal dissipation tape has been specially designed to tackle one of the most common challenges when using LED strips: excess heat generated by the lighting sources. Thanks to its advanced technology, this tape ensures efficient thermal dissipation, allowing your LED strips to operate optimally for extended periods of time.

The 25-meter double-sided thermal dissipation tape is the ideal choice for those seeking a secure and long-lasting installation. Its high-quality double-sided adhesive provides a firm and reliable grip, keeping your LED strips in place regardless of the conditions. Whether you install them indoors or outdoors, this tape is waterproof and weather-resistant, ensuring the safety and protection of your LED lighting.

With its generous dimensions of 25 meters, this thermal dissipation tape offers you the flexibility to cut it to size, perfectly fitting your installation needs. Whether you're working on a personal project or a large-scale professional installation, this tape will adjust seamlessly.

Don't compromise the quality of your LED strips with inferior thermal dissipation tapes. Trust in the best quality and performance that only the 25-meter double-sided thermal dissipation tape can offer. Optimize your LED lighting experience and enjoy exceptional durability.

Don't waste any more time and ensure the success of your LED lighting projects with the 25-meter double-sided thermal dissipation tape! Experience the peace of mind knowing that your lighting is in good hands and that your creative lighting knows no bounds.

At FactorLED, we guarantee that our products are of the highest quality and provide all the necessary elements for DISTRIBUTION, IMPORTATION, or WHOLESale, including the technical specifications of each LED product.
