Product short description:

The **Supplementary frame** is ideal to cover the ceiling cut holes that have been left with a \varnothing greater than the cut of the downlight, in this way you will not lose the design of your space. You will also be able to customize your lights and make your own and personalized design to your needs.

Product description:

Frame supplementary Hoop Cover for Downlight

Frame supplementary with an elegant design, it is recommended to use it for downlight slim, **covering** a gap larger than what can **cover** the focus. Its measures are:

- Inside cut: $\varnothing 203\text{mm}$
- Outer cut: $\varnothing 254\text{mm}$

This product allows you to cover the gaps that have become too large for the plate or downlight, thus roof cuts up to $\varnothing 255\text{mm}$ are covered with the ring.

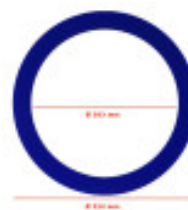

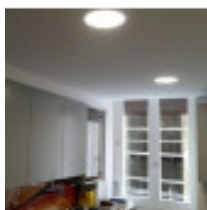

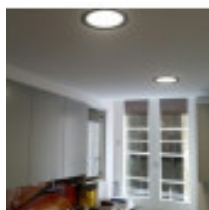

It is perfect for a new construction site. It has IP20 protection, making it ideal for indoor use.

Uses for Frame supplementary Hoop Cover for Downlight

- Domestic
- Professional
