# Circular Ring - White - Adjustable for GU10

Product code:

Reference: 91807

Technical specifications:

REFERENCE: 91807
Construction Material: Polycarbonate
Certifications: CE
Dimensions (mm): Ø110x27mm
Cut-out Size (mm): Ø80mm

Product short description:

The WHITE orientable circular ring for GU10 in polycarbonate is an elegant and functional solution for indoor lighting, while also allowing for installation in high-humidity areas and saline coastal zones, as it does not deteriorate like metals.

The design allows for adjusting the direction of light, making it ideal for highlighting specific elements in a room or creating a pleasant atmosphere in any space. Installation is super easy. It withstands coastal areas and high-humidity zones without deteriorating, as it is made of polycarbonate.

Product description:

Circular Ring - White - Adjustable for GU10

The adjustable white ring for GU10 is an elegant and functional lighting accessory designed to provide a flexible and precise lighting solution indoors.

The **white circular frame** for GU10 and dichroic LED modules has a stylish finish that seamlessly integrates with any interior decor, adding a touch of sophistication. Additionally, its compact size and lightweight make installation and handling easy.

The ring is made of PC (polycarbonate) and offers several advantages for use in humid or coastal areas:

1. Moisture resistance: The PC material used in the ring's manufacturing has moisture resistance properties. This means it can withstand high humidity conditions without damage or corrosion, making it suitable for use in areas with higher humidity levels.
2. Corrosion protection: Being made of PC, the White CIRCULAR ring is resistant to corrosion caused by exposure to saltwater in coastal areas. This allows it to maintain its appearance and functionality even in aggressive marine environments.
3. Durability: The PC material used in its manufacturing is known for its durability and impact resistance. This makes the ring capable of withstanding adverse conditions such as strong winds, water splashes, or sand, typical in coastal areas.

This **frame** is specifically designed to accommodate **GU10** bulbs and dichroic LED modules, which can be easily installed and replaced thanks to its simple and secure fastening mechanism.

At FactorLED, we ensure that our products come with a QUALITY guarantee and provide all the necessary elements for DISTRIBUTION, IMPORT, or WHOLESALE, including the technical specifications for each LED product.
