

## Solar Lamp Support - for Wall - Steel - Black - 54 cm

### Product code:

Reference: 91860

### Technical specifications:

REFERENCE: 91860  
Construction Material: Steel  
Certifications: CE  
Dimensions (mm): 500x15mm Ø75mm  
Warranty Years: 3

### Product short description:

Illuminate your path with our arm for LED steel lighting, black steel solar LED lanterns, 54cm. Its elegant and modern design integrates perfectly into any urban environment. Manufactured with black powder-coated steel, our bracket guarantees weather resistance. It is the perfect choice for reliable and bright lighting on paths, streets, and parks. Add sophistication and style to your urban environment with our street lamp arm. Make the night shine with our 54cm steel Solar street lamp bracket!

### Product description:

Aluminum Support for Solar Lamp Post - for Pole and Wall - Steel - Black - 54cm

Our steel support for solar lamp post is the perfect complement to illuminate and enhance any urban or outdoor space. With a length of 54cm, this support is designed to hang solar lamps on wooden, concrete, steel columns, and walls. Its versatility allows it to adapt to any type of structure and environment, and its elegant design adds a modern and sophisticated touch to the decor.

Whether you need to light up a street, a park, or any other urban space, our lamp post support is the perfect choice for reliable and bright lighting. Furthermore, its easy installation makes it very convenient to attach to any structure, enabling a quick implementation and an immediate improvement in the lighting in your surroundings.

In summary, our solar lamp post support is an elegant, durable, and reliable lighting solution that adapts to any urban or outdoor environment. With its modern design and guaranteed resistance, this support is the perfect choice to enhance lighting and safety in your community.

Our LED luminaire arm, support for LED lighting, is made of steel, offering many advantages:

- **Durability:** Steel is a robust and durable material, ensuring longevity and the ability to withstand adverse weather conditions.
- **Lightweight:** Steel is a lightweight material compared to other metals, facilitating installation and reducing the overall weight of the LED lamp post.
- **Corrosion resistance:** Steel has high corrosion resistance, making it ideal for lamp post supports exposed to the elements for extended periods.
- **Sustainability:** Steel is a recyclable material, making it an eco-friendly option and in line with sustainability principles.

Uses of the Support for Solar Luminaire - for Column and Wall - Steel - Black - 54 cm

- **Street lighting:** The luminaire support is commonly used to install luminaires and improve lighting in streets, avenues, and roads. The 54cm luminaire support is an ideal option for installing luminaires on columns and walls.
- **Park and garden lighting:** The luminaire support can also be used to illuminate parks, gardens, and outdoor public spaces. With the 54cm luminaire support, luminaires can be securely and durably installed on any surface.
- **Parking lot lighting:** Parking lots are another location where luminaires can be installed using the luminaire support. The 54cm luminaire support is ideal for hanging luminaires on columns and walls around parking lots to provide efficient and safe lighting.
- **Industrial area lighting:** The luminaire support can also be used to illuminate industrial areas such as warehouses, factories, and loading/unloading zones. The 54cm luminaire support is sturdy and durable, making it suitable for use in demanding industrial environments.

At FactorLED, we are committed to ensuring that our products are of high QUALITY and provide the necessary elements for DISTRIBUTION, IMPORTATION, or WHOLESALE, including the technical specifications of each LED product.
