

RF Controller for Dimming LED Lights Single Color + CCT - 2.4Ghz

Product code:

Reference: 92066-K1

Technical specifications:

REFERENCE:
Nominal Voltage:
Dimmable: YES
Certifications: CE - ROHS
IP : IP20
Dimensions (mm):
Temperature Range (°C): -10°C ~ +40°C
Warranty Years: 3
Range (m):

Product short description:

The RF 2.4GHz Control Panel is the perfect solution for easy and intuitive control of your monochrome and CCT LED luminaires. It allows precise adjustment of brightness and color temperature through a rotary wheel. With a range of 30 meters and the ability to manage up to 4 zones, it is ideal for all types of spaces. Easy to install, it attaches magnetically to the wall for added convenience. This panel offers total control over your lighting.

Product description:

RF Controller for Dimming LED Lights Single Color + CCT - 2.4Ghz

The RF Control Panel is an advanced device designed to offer intuitive and efficient control over monochrome and CCT LED luminaires, ideal for those seeking versatility and convenience in lighting management. This panel, which operates with 2.4GHz wireless control technology, ensures low power consumption, fast communication, and an anti-interference system, making it a reliable and durable option for homes and commercial environments.

Precise Control and Advanced Features The panel allows precise adjustment of both brightness and color temperature of luminaires via an intuitive rotary wheel. This wheel not only offers smooth control but is also equipped with various functions:

- **Short press:** Quickly turns lights on or off.
- **Rotational movement:** Precisely adjusts brightness to create the perfect ambiance.
- **Long press while the light is on:** Activates color temperature mode (CCT). By turning the wheel, you can adjust the light tone between warm and cool, providing flexibility to suit different times of the day or specific needs.

Compatibility and Multi-zone Control This panel is fully compatible with all 2.4GHz Miboxer/Milight monochrome and CCT products, offering you great flexibility in choosing your LED luminaires. Moreover, its ability to control up to 4 lighting zones individually allows you to manage different areas of your home, office, or commercial space from a single panel. There is no limitation on the number of bulbs you can control, making it an ideal option for large lighting projects.

Easy Installation and Elegant Design The RF Control Panel is easy and convenient to install. It attaches magnetically to a wall-mounted support, making it not only easy to mount but also to remove when necessary. This adds a touch of elegance and functionality to the design, providing a simple and comfortable user experience.

Range and Superior Performance With a range of up to 30 meters, the panel offers broad coverage, allowing you to manage the lighting from anywhere in the room or even nearby areas without needing to point directly at the receiver. This level of convenience and flexibility ensures you can adjust the light effortlessly according to your needs, optimizing comfort in your space.

In summary, the RF Control Panel is a comprehensive solution for those looking to efficiently personalize their lighting, with advanced features such as brightness and color temperature adjustment, multi-zone control, and easy installation. It is perfect for homes, offices, and commercial spaces that require a flexible and highly controllable lighting system.

This remote requires a dimmer controller
